2. For Portfolio holdings as of December 31, 2005, we traced 100% of the security holdings (i.e., ticker symbol and number of shares) to the underlying transactions, as disclosed in the Trading Log and respective Transaction Alerts, and verified the number of shares held at December 31, 2005. No exceptions were noted.
3. For Portfolio holdings as of December 31, 2005, we verified the closing price using historical pricing information published at www.bigcharts.com. No exceptions were noted.
4. For Portfolio holdings as of December 31, 2005, we recalculated the market value using the verified shares held and the closing price as of such dates. No exceptions were noted.
5. We selected a 20% sample of transactions (excluding interest and dividend transactions) from each respective Portfolio Trade Log and traced each transaction to the applicable Transaction Alert. No exceptions were noted. For each sample item selected, we also performed the following:
 - a. We verified the number of shares disclosed in the Trading Log to the Transaction Alert. No exceptions were noted.
 - b. We verified that the price per share disclosed in the Trading Log agreed to the information disclosed in the Transaction Alert and that the price per share was traded in accordance with the Trading Rules (as disclosed at <http://www.findprofit.com/tradingrules.htm>, last updated during October 2005, effective January 1, 2005). No exceptions were noted.
 - c. We verified that the commission charged was accounted for in accordance with the Trading Rules. No exceptions were noted.
 - d. We recalculated the total cost or the total proceeds, as applicable, and verified such amount to the Trade Log. No exceptions were noted.
6. We reviewed the year-end reconciliation of each portfolio's cash balance as of December 31, 2005, and agreed the reconciled balances to each respective portfolio's value as of December 31, 2005. Exceptions were taken into account in the return of investments "As Calculated by MFA" (see # 1).
